## Strive For Success

### Letterbox Assignment: Design and build a letterbox

Create a unique/rural design of what you want your letterbox to look like, be as creative as you like but be sure it has a big enough area for small packages, and a visible number.

1. Your Letterbox needs to be no bigger than a standard letterbox and include specific features relating to NZ Post standards both present and past.
2. Collect materials to use, these need to be mostly recycled or repurposed materials. If you are using an old letterbox, be sure to make your additions to it extra, do not go out and buy one brand new.
3. Build and decorate your letterbox and decide what kind of additional features you would like to add.
4. You will need an A3 sheet or booklet that goes with your letterbox, this shows the judges your research about the letterbox, your design process and your construction process. Your project will not be included in judging without this paperwork OR a digital diary no longer than 2 minutes. This should include photos, from start to finish, hand drawn designs and research.

Feel free to personalise your letterbox with your own unique flare. These additions may just win you a spot prize!

Happy creating whanau! We look forward to seeing your creations on display this year!

Kind regards,
